

# Smith Ecological Systems

A Sister Company to VIKING Chemical Company

Smith Ecological Systems has provided equipment to the municipal water and waste water industry for over five decades. Our commitment to the industry has been based on providing the highest quality equipment with excellent service and at a fair cost. Over the years our customers have realized significant savings in the areas listed below:

- Reduce electrical cost thru our high efficiency pumps.
- Improve “C” factors on systems due to the use of our chlorinator units.
- Increased efficiency of system thru “SES Maintenance Plus Program”.
- Water savings thru decreased hydrant flushings.
- Savings in chemical cost due to the use of our Strantrol controllers.
- Improved monitoring of water systems via the Strantrol analyzers.

As a member of the Viking Group, we now also have the expertise to provide chemical recommendations for your plant operational needs. Contact us for your equipment, chemical and servicing needs.
